

SELAUS ACADEMY

Digital Marketing & E-commerce Portfolio

Portfolio Demonstration / Sample Case Study

Meta Ads → Google Ads → Canva → CapCut → AI Content → E-commerce Marketing → Analytics → Portfolio

Prepared by: Selaus Hemrom

Portfolio: selaus-hemrom.netlify.app

Academy: selaus-academy.netlify.app

Digital Solutions: selaus-digital-solutions.netlify.app

Important: This document is a professional portfolio demo/sample. Any campaign metrics shown as “Illustrative” are example figures for demonstrating how I plan, execute, analyze and report a campaign. They are not presented as verified client results. Before submitting this portfolio as evidence, replace illustrative metrics with real platform screenshots or export data.

1. Executive Summary

- End-to-end digital marketing workflow designed for an e-commerce or education brand.
- Campaign structure covers awareness, engagement, traffic, lead generation and conversion.
- Creative workflow combines Canva design, CapCut short-form video editing and AI-assisted content production.
- Analytics focuses on Reach, CTR, CPC, CPM, Leads, Cost per Lead, Conversion Rate and ROAS.
- Final portfolio package demonstrates strategy, execution, optimization and reporting—not just individual tool usage.

Core objective

Build a repeatable customer-acquisition system that turns attention into measurable actions: Reach → Engage → Visit → Lead/Message → Purchase → Retention.

Ideal use cases

Business type	Primary goal	Main channels
E-commerce	Sales / qualified messages	Meta, Google, WhatsApp
Training / Academy	Leads / registrations	Meta, Google, landing page
Local service	Calls / messages / enquiries	Meta, Google Search

2. Campaign Funnel & Customer Journey

The campaign is structured so every stage has a clear purpose and measurable KPI.

Stage	Execution	Key KPI
Awareness	Video, image, educational content	Reach, CPM, Video Views
Engagement	Useful posts, Reels, social proof	Engagement Rate
Traffic	Landing page / product page / website	CTR, CPC
Lead	WhatsApp, Messenger, form	Leads, CPL
Conversion	Offer, retargeting, follow-up	Purchases, CPA, ROAS
Retention	Remarketing, follow-up, content	Repeat purchase / response

Portfolio deliverable

- Campaign brief
- Audience profile
- Creative concepts
- Ad copy
- Tracking plan
- Performance dashboard
- Optimization log
- Final case-study report

3. Meta Ads — Demo Campaign

Demo campaign name: Selaus Academy – Free Digital Marketing Orientation Lead Campaign

Campaign setup

Item	Demo setup
Objective	Leads / WhatsApp conversations
Location	Bangladesh
Age	18–40
Audience	Digital skills, freelancing, career development, small business
Creative	1:1 image + 9:16 Reel
CTA	Send WhatsApp Message / Learn More
Test budget	₹100–₹300/day (example only)

Illustrative performance snapshot — NOT actual results

Metric	Illustrative result	Interpretation
Reach	8,500	Audience exposure
Impressions	10,900	Total ad delivery
CTR	1.8%	Traffic interest
CPC	₹7.20	Cost per click
Messages	42	Direct enquiries
Cost / Message	₹18.60	Lead efficiency

Optimization approach: compare creatives, improve hook, test audience segments, exclude low-intent groups, monitor frequency, and shift budget toward the best-performing ad set.

4. Google Ads — Demo Search Campaign

Demo campaign: Digital Marketing Course / E-commerce Service Search Campaign

Component	Example
Campaign type	Search
Ad groups	Digital Marketing Course / Social Media Marketing / Freelancing Training
Keyword intent	High-intent commercial keywords
Ad assets	3 responsive search ads per ad group
Landing page	Relevant service/course page
Conversion	Form submission / WhatsApp click

Sample keyword planning

Keyword	Intent	Action
digital marketing course Bangladesh	High	Bid/test
social media marketing service	High	Bid/test
facebook ads service Bangladesh	High	Bid/test
digital marketing training online	Medium-High	Test
free digital marketing course	Low/lead magnet	Separate campaign

Tracking: Google Ads conversion tracking + landing-page analytics. Actual conversion numbers should be added only after the campaign has real data.

5. Canva — Creative Production System

Deliverables I can create for an e-commerce or training brand:

- Facebook / Instagram campaign posts
- Offer banners and product promotions
- Carousel posts
- Lead-generation graphics
- Course announcements
- Testimonials and social-proof creatives
- YouTube thumbnails
- WhatsApp catalogue / promotional graphics

Creative specification

Format	Use
1080 × 1080	Facebook / Instagram square post
1080 × 1350	Instagram portrait feed
1080 × 1920	Reels / Stories
1280 × 720	YouTube thumbnail / video graphic

Design rule: one clear message, strong visual hierarchy, readable CTA, brand consistency, mobile-first typography and a single conversion objective per creative.

6. CapCut — Short-Form Video Workflow

Demo production workflow

Step	Action
1	Write 15-45 second hook-based script
2	Collect product / brand visuals
3	Cut dead space and keep fast pacing
4	Add captions and key text
5	Use transitions only when they improve clarity
6	Add CTA and brand identity
7	Export 1080 × 1920 for Reels / Shorts / TikTok

Example video structure

0-3 sec: Hook → 3-10 sec: Problem → 10-20 sec: Solution / product benefit → 20-30 sec: Proof / feature → 30-35 sec: CTA.

7. AI-Assisted Content Production

AI is used as a productivity layer—not as a substitute for strategy, fact-checking or brand judgment.

Task	AI-assisted workflow
Research	Topic ideas, audience pain points, competitor themes
Script	Hooks, short video scripts, CTA variations
Copy	Ad copy, captions, product descriptions
Creative ideation	Visual concepts, campaign angles, A/B variants
Repurposing	Long content → Reel → Story → Carousel → Caption
Quality control	Human review for accuracy, tone, claims and originality

Portfolio proof: include 3-5 before/after examples showing the original brief, AI draft, human-edited final version and published creative.

8. E-commerce Marketing Strategy

Example product campaign system

Phase	Content / Ad	Goal
Discovery	Problem/benefit Reel	New audience
Consideration	Product demo / comparison	Build interest
Trust	Review / testimonial / UGC	Reduce hesitation
Conversion	Offer + urgency + CTA	Purchase
Remarketing	Viewed / engaged audience	Recover lost buyers

Conversion assets

- Product landing page
- Clear benefits and specifications
- Trust elements
- FAQ
- Delivery / payment information
- WhatsApp support
- Strong CTA
- Retargeting audiences

9. Analytics & Reporting

Core KPI dashboard

KPI	What it tells me	Optimization decision
CPM	Cost to reach audience	Audience / creative quality
CTR	Ad relevance	Improve hook/copy/creative
CPC	Traffic efficiency	Improve CTR and targeting
CPL	Lead cost	Optimize audience + conversion
CPA	Customer acquisition cost	Optimize full funnel
Conversion Rate	Landing/offer effectiveness	Improve page/offer
ROAS	Revenue vs ad spend	Scale or reduce spend

Weekly optimization log — portfolio template

Date	Observation	Change	Result
Week 1	Creative A higher CTR	Shift test budget	To be filled with actual data
Week 2	Audience B lower CPL	Increase budget carefully	To be filled with actual data
Week 3	Frequency rising	Refresh creative	To be filled with actual data

10. Portfolio Evidence Structure

To make this case study credible to an employer or client, attach real evidence wherever possible.

Skill	Recommended evidence
Meta Ads	Ads Manager campaign screenshot + campaign settings + real results
Google Ads	Google Ads campaign screenshot + keyword/ad structure + real results
Canva	3-5 finished creatives + editable design link if appropriate
CapCut	2-3 finished short videos + screenshots of editing timeline
AI Content	Brief → AI draft → human-edited final
E-commerce	Product campaign plan + landing page + ad creative
Analytics	Anonymized dashboard / export + optimization notes
Portfolio	Website case-study page + PDF case study

Do not fabricate: client names, revenue, ROAS, leads, sales, ad spend, screenshots or testimonials. If a project is self-initiated, label it “Self-Initiated Demo Project.”

11. Ready-to-Use Case Study Copy

Project: Selaus Academy – Digital Marketing & Student Acquisition Demo

Challenge: Build awareness for digital-skills training and turn social attention into qualified enquiries.

Strategy: Use Meta Ads for social discovery and WhatsApp conversations, Google Search for high-intent traffic, Canva for consistent creatives, CapCut for short-form video, AI for rapid content ideation, and analytics for continuous optimization.

Execution: Developed audience segments, campaign structure, creative concepts, ad copy, short-video scripts, tracking framework and weekly optimization process.

Outcome: The portfolio demonstrates an end-to-end marketing system. Real performance outcomes should be inserted from verified platform data once the demo campaign has completed.

My role

- Digital Marketing Strategy
- Meta Ads Planning
- Google Ads Planning
- Canva Creative Design
- Short-form Video Content
- AI-assisted Content Production
- E-commerce Marketing
- Performance Analytics
- Portfolio / Case Study Development

12. Professional Service Profile

Selaus Hemrom — Digital Marketing, Content & E-commerce Support

I help small businesses, e-commerce brands, training organizations and personal brands build a practical digital presence using paid advertising, content, creative design and performance tracking.

Service stack

Service	Deliverables
Meta Ads	Campaign setup, audience, creative testing, optimization
Google Ads	Search campaign planning, keywords, ad copy, conversion structure
Canva	Social creatives, banners, carousels, thumbnails
CapCut	Reels, Shorts, product videos, captions
AI Content	Scripts, captions, ideas, repurposing
E-commerce	Product promotion, funnel, remarketing strategy
Analytics	KPI dashboard, reporting, optimization recommendations
